

Enhanced Fujita Scale

Developed by scientist T. Theodore Fujita to measure tornadoes

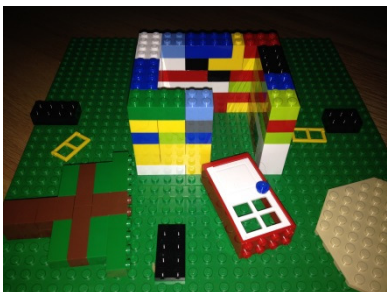

EF-0 Wind Speed: 65-85

Tree branches torn off trees

EF-1 Wind Speed: 86-110

Tree branches down, windows shattered

EF-2 Wind Speed: 111-135

Roof torn off, door and windows scattered, trees uprooted

EF-3 Wind Speed: 136-165

Train cars tipped over, roof torn off, door and windows scattered, trees uprooted

EF-4 Wind Speed: 166-200

Cars moved hundreds of yards, buildings leveled

EF-5 Wind Speed: 200+

Buildings destroyed and found miles away, cars on top of buildings
